

Release Notes

Versioning Scheme

Blogr follows [Semantic Versioning](#). Major releases are aligned with major releases of **Laravel** and **FilamentPHP** — upgrading one generally requires upgrading the others.

Minor and patch releases never contain breaking changes. When requiring Blogr from your application, use a version constraint such as `^2.0`.

Named arguments are not covered by backwards compatibility guarantees. Parameter names may change in future minor releases.

Support Policy

Happytodev

Blogr adopts a **version-based** support policy:

- Only the **latest major version** receives bug fixes.
- The **previous major version** receives security fixes for **6 months** after the next major is released.
- Older versions are **end of life (EOL)**.

Version	Range	Status	Bug Fixes	Security Fixes
v1	1.0.0 - 1.32.0	☐☐ EOL	☐	☐ until Jan 7, 2027
v2	2.0.0+	☐☐ Active	☐	☐
v3	(future)	↗ Upcoming	—	—

Version Compatibility

Blogr Core

Blogr	Laravel	Filament	Livewire	PHP	Status
v1.x	12.x	v4	3.x	^8.3	☐ EOL
v2.x	13.x	v5	4.x	^8.3	☐ Active
v3.x	14.x	v6	5.x	^8.4	🔗 Preview

Official Plugins

All first-party plugins follow Blogr's major version number. When upgrading Blogr to a new major, plugins must be upgraded in lockstep.

Plugin	v1.x	v2.x	v3.x
blogr-comments	^1.1	^2.0	^3.0
blogr-gdpr	^1.5	^2.0	^3.0
blogr-artist	^1.0	^2.0	^3.0
blogr-docs	^1.10	^2.0	^3.0

Additional Dependencies

Dependency	v1.x	v2.x	v3.x
spatie/laravel-permission	^6.0	^8.0	~
spatie/laravel-backup	^9.0	^10.0	~
spatie/laravel-package-tools	^1.15	^1.15	~
orchestra/testbench	^10.11	^11.0	~
pestphp/pest	^3.x	^4.0	~

Blogr v2 — Laravel 13 / Filament v5

Released July 2026 · [v2.0.0](#)

Blogr v2 is a **stack upgrade release**. It migrates the package from Laravel 12 / Filament v4 to Laravel 13 / Filament v5, picking up the latest framework improvements while maintaining full backward compatibility in the public API.

Stack

- **Laravel 13** — first-party AI SDK, JSON:API resources, `PreventRequestForgery`, queue routing by class, expanded PHP attributes, vector/semantic search
- **Filament v5** — Livewire 4, instance-based panel providers, plain string icons, Schema components
- **Livewire 4** — `ComponentRegistry` removed, component name resolution via `Str::kebab()`
- **spatie/laravel-permission ^8.0** — upgraded from ^6.0

Notable changes

- All filament packages pinned to ^5.0 (`filament/actions`, `filament/filament`, `filament/schemas`, `filament/support`, `filament/tables`)
- Livewire registration updated for Livewire 4 across core and all plugin packages
- Testbench upgraded to ^11.0, Pest remains at ^4.0

Note: This section is a living document. New features shipped in v2.x releases will be documented here as they land.

Blogr v1 — Laravel 12 / Filament v4

Released June 2026 · v1.0.0 – v1.32.0

Blogr v1 introduced the full multilingual blog and CMS system for Laravel 12 and FilamentPHP v4.

Translation-First Engine

- Architecture with dedicated translation tables for posts, categories, tags, series, and CMS pages
- 4 built-in locales (EN, FR, ES, DE), support for 24+ languages
- Locale auto-detection, disable, and restrict
- Dynamic locale fields — adding a locale requires no code changes

CMS Page Builder

- 7 page templates (Default, Landing, Contact, About, Pricing, FAQ, Custom)
- 23 block types (Hero, Features, Testimonials, CTA, Gallery, FAQ, Team, Pricing, Content, Blog Posts, Stats, Timeline, Video, Newsletter, Map, Contact Form, Wave/Directional/Clip Path/Margin/Animation Transitions, Blog Title, Background Wrapper)
- 5 background types per block (none, solid, gradient, image, pattern) with dark mode variants
- Gradient-aware transition blocks with automatic color blending

Filament Admin Panel

- 5 CRUD Resources (BlogPost, Category, Tag, BlogSeries, CmsPage)
- Translation repeater with inline management
- Role-based permissions (Admin / Writer)
- Centralized Settings page with 85+ fields across 7 tabs

Frontend

- Responsive blog index, post detail, category/tag/author/series pages
- Markdown with Prism.js syntax highlighting and video embed support

- Dark mode, 5 color presets, 16+ configurable colors
- Mega menu, language switcher, theme switcher
- Table of Contents, heading permalinks, reading time, TL;DR
- WCAG 2.2 AA compliant

Notable v1.x features (by release)

- **Callouts** (v1.29.0) — `:::tip / :::info / :::danger / :::caution` admonitions in Markdown with `CalloutMarkdownEditor` toolbar
- **Nav Link Types** (v1.30.0) — `LinkTypeRegistry` with plugin-resolvable link types, sub-menu CMS page support
- **Theme Switcher Dropdown** (v1.31.0) — text labels, translated tooltips, system mode icon
- **Image Lightbox** (v1.32.0) — full-screen Alpine.js overlay for Markdown images

Happytodev

Blogr v3 — Future (Laravel 14 / Filament v6)

This section will be filled when development begins.

Expected stack: Laravel 14.x, Filament v6, Livewire 5.x, PHP 8.4+.

Plugins will follow the same major version bump pattern: `^3.0` for all first-party packages.
